

# INSOLE WITH HIGH ARCH & HEEL CUP

## ABOUT THE PRODUCT

Insole with High Arch & Heel Cup is for enhanced support and comfort. This design is particularly beneficial for individuals who suffer from foot pain or require additional stability. The high arch provides targeted support to the foot's natural curve, distributing pressure evenly and reducing strain on the arch. Meanwhile, the heel cup cradles the heel, offering shock absorption and helping to maintain proper foot alignment. Whether you're on your feet all day, engaging in sports, or simply seeking extra cushioning, these insoles can make a significant difference in your daily comfort and overall foot health.

## BENEFITS

- Conforms to foot contours (arch) & supports heel, arch & ankle preventing progressive flat foot, knee and spinal pain.
- Enhance body performance by elastomeric blood flow with complete body alignment/body weight re-distribution.
- Soft cushion which relieves tenderness to pressure and irritative conditions on the sole and heel of the foot.

## HOW TO USE

- Place it firmly inside your shoe or slipper, smoothing out any air bubbles.
- Test the grip by taking a few steps to ensure stability.
- To remove, gently peel from one corner without leaving residue.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
