

TOE CREST

ABOUT THE PRODUCT

A gel toe crest is designed to support and lift toes that are bent or curled, such as with hammer, claw, or mallet toes. It fits underneath the toes and a loop secures it around one toe, helping to straighten them and relieve pressure from the tips of the toes and the ball of the foot. The gel material also provides cushioning to absorb shock and reduce friction.

BENEFITS

- Relieve pressure and pain caused by hammer toes, claw toes and mallet toes.
- Ergonomically designed to fit the curve of toes.

HOW TO USE

- Place the toe crest under the affected toes, positioning it so the toes rest comfortably on top for gentle lifting and support.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
