

# CERVICAL SUPPORT

## ABOUT THE PRODUCT

A cervical support with a one-sided contour is a specialized pillow designed to provide ergonomic support for the neck and head. Unlike a standard flat pillow, it features a raised, contoured ridge on one side that follows the natural curve of the neck. This design helps to keep the spine in proper alignment while sleeping or resting, which can alleviate neck pain, reduce muscle tension, and improve sleep quality. The supportive contour helps to fill the gap between the neck and shoulder, preventing the neck from bending at an unnatural angle. This makes it an effective tool for those with chronic neck issues or for people who simply want to improve their sleeping posture.

## BENEFITS

- The orthopaedic pillow maintains its shape providing cervical support and keeping your neck level aligned with your spine.
- The contour pillow is great for those with sports injuries, arthritis or whiplash related issues.
- Pillow is flexible, yet stiff for good support.

## HOW TO USE

- Place the cervical support on the bed or pillow area with the contoured side facing up.
- Lie down so your neck rests comfortably in the curved contour.
- Adjust your position until your head and neck feel fully supported.

**Instructions :** If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

**Safety :** Keep away from heat and sharp objects.
