

PILES SEAT SUPPORT

ABOUT THE PRODUCT

A Piles (Hemorrhoid) Seat Support is a specialized cushion designed to relieve pressure and pain associated with hemorrhoids, post-partum recovery, or other conditions affecting the anal and perineal regions. It is typically a ring-shaped or donut-shaped cushion, or a pad with a large central cut-out, made from foam, air, or gel. This design ensures that the sensitive area is suspended in the air, preventing any direct contact or friction with the hard seating surface, which is crucial for reducing pain, swelling, and promoting healing.

BENEFITS

- Flat seat cushion with donut cut out to provide air cushioning to middle of buttock area (piles), top 18 mm corrugated gel sheet distribute pressure equally at buttocks, manages body heat and conforms body shape.
- Sitting mass, stability to cushion is provided by closed cell high density PU foam beneath corrugated gel sheet, encapsulated in incontinent proof and breathable extension fabric (wicks away moisture & heat).

HOW TO USE

- lace the cushion on the chair with the open cut-out at the rear side.
- Sit slowly, ensuring the affected area stays over the cut-out without pressure.
- Adjust your seating position for maximum comfort and balanced support.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
