

BED SORE PREVENTION SHEET PLAIN

ABOUT THE PRODUCT

A bed sore prevention sheet is a type of mattress overlay or pad designed to reduce the risk of pressure ulcers, also known as bed sores. These sheets are made from materials like medical-grade silicone or gel and work by distributing body weight evenly, reducing pressure on bony areas, and minimizing friction and shear forces that can cause skin breakdown. They are particularly beneficial for individuals who are bedridden or have limited mobility. The sheets may come in different surfaces, such as "plain" for a smooth surface or "corrugated" (Cor.) for a textured surface that allows for better air circulation and further pressure relief.

BENEFITS

- Anti-sweating (corrugated) or extreme pressure distribution (plain) variants of bed sore sheets provide ideal choice to patients suffering or prone to suffer from bed sores.
- Extremely softness grade of gel provides enhanced comfort and care to patients.

HOW TO USE

- Spread & Smooth: Place the sheet flat on the mattress, ensuring no wrinkles or folds.
- Position Patient: Gently place the patient on the sheet, covering pressure-prone areas like back, hips, and heels.
- Maintain & Reposition: Check daily, keep the sheet clean, and reposition the patient regularly to prevent sores.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
