

GEL FINGER TUBE OPEN ENDED

ABOUT THE PRODUCT

Livish Gel Open End Tube is a soft, stretchable sleeve designed to protect toes or fingers from pressure, friction, and irritation. Ideal for corns, blisters, calluses, or sensitive skin. The open-end design allows better air circulation and easy fit for different lengths. Made with skin-safe, washable gel, it provides all-day cushioning, comfort, and protection.

BENEFITS

- Progel ribbed knit tubes are fully lined with medical grade gel to provide all around digital protection while absorbing shock and pressure. Tubing can be trimmed to meet individual sizing needs.
- Not as bulky as conventional foam tubing.
- Durable and will not bottom out as foam material do.
- Can aid in reducing scar tissue.
- Fit toes or fingers (average tube length is 8").(average cap length is 8") and can be cut to size

HOW TO USE

- Clean & dry finger.
- Slide tube onto the finger and position over the sensitive area.
- Adjust for comfort and use during daily activities for cushioning & protection.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
