

GEL FINGER CAP

ABOUT THE PRODUCT

A gel finger cap is a protective covering made from soft, flexible gel, designed to fit over a finger. It cushions and protects against irritation, friction, or pressure, aiding those with cuts or blisters. The gel ensures a secure fit, remaining in place during sports, work, or daily activities. Reusable after cleaning, these caps offer a practical, cost-effective solution for finger protection, providing comfort and promoting healing in various situations.

BENEFITS

- Medical grade cap that isolates the injured / infected toe preventing the aggravation of injury due to frictional impact of the next toe.
- Helps to reduce discomfort associated with ingrown toenails, blisters, corns and other toe injuries. The cap reduces friction against the affected toe and provides general support and protection.

HOW TO USE

- Gently insert the finger into the gel cap and pull it until it fully covers the sensitive or injured area.
- Adjust for Comfort: Ensure it fits snugly without tightness. Use during daily activities to protect against friction, pressure, and minor injuries.

Instructions : If the product gets dirty or sticky, clean with talcum powder, rinse with mild shampoo and water, shade dry, and avoid direct heat.

Safety : Keep away from heat and sharp objects.
